Hello Mr. Laing,

Various experts representing a variety of disciplines within Planning and Infrastructure Services have met and developed a short, medium term strategy and continue to look at a long term strategy for Heart Lake Road. If they haven't as of yet, they should be arranging a meeting with you shortly to discuss these ideas and the plan to move forward in the areas of the hotspots. Hopefully these solutions will create a better environment for both people and wildlife and offer some longer term protection.
Regards,

Marilyn Ball

Subject: Heart Lake Road

Hello Chief Ball,

A quick note to thank you for your comments during last evening's PDD meeting in support of protecting the area along Heart Lake Road adjacent to Countryside Drive and your commitment to action in the short-term along with evaluating a longer-term more strategic approach. Please let me know how I can help bring both the actions and the strategy to fruition.

Regards,

David
