

## 2017 06 01 Roadworks and Parks Projects Report by Kevin Montgomery

Here is the progress on the "Brampton Projects" tracker I discussed a month or 2 ago. I've been making progress to the point where I can now share Spreadsheets of Roadworks and Parks projects -- both of which can have implications for cycling in Brampton.

I've attached 2 CSV files for Roadworks and Parks projects. [not attached here] They should open in either Excel or OpenOffice, using a "semi-colon" delimiter to break up the data into columns. The data itself is quite raw, but it is sortable once formatted for your spreadsheet software.

The next steps for this project are:

- Automatically create/update "reader-friendly" posts regarding new and updated projects.
- Have the ability for these posts to automatically email people that have subscribed to receive them.

These emails could also be used to initiate a dialogue with schools and businesses that stand to benefit from the introduction of cycling infrastructure near their respective locations.
